

Combined Bicycle Traffic over Four Main Portland Bicycle Bridges Juxtaposed with Bikeway Miles

Extrapolated from peak period counts

Year

Portland's Bikeway Network increased 215% between 1991 and 2004. During that same period, the number of bicycle riders daily crossing the four main bicycle bridges in Portland increased 210%. This increase was especially noticeable on the Broadway, Hawthorne, and Steel Bridges, where combined daily ridership went from 2,115 in 1991 to 7,910 in 2004. During this period, the bikeway network feeding these bridges was greatly improved, as were facilities on the bridges themselves.
